

## Waste Not Want Not

### Agri-Food Solutions for a Hungry World

Tuesday 5 March 2013

SCI HQ, London, UK - 09:30 - 17:30

#### Synopsis

Huge amounts of food are wasted along the chain from farm, through storage and processing, to retailers and finally consumers. Some estimates put the figure as high as 50%. Reducing food waste would relieve some of the pressure to increase the area of land used for agriculture. It would also have significant environmental benefits. Speakers at this conference will discuss the current situation with respect to food waste and initiatives to address the problem in the UK and across the world, from 'farm to fork'. Some particular projects being undertaken by universities, research institutes, retailers and other organisations will be showcased to illustrate progress and opportunities available.

Organisations represented are Defra, J S Sainsbury, WRAP, CABI, Food and Drink Federation, AHDB, Campden BRI, University of Nottingham and Cranfield University.

#### Papers and Posters

Posters are invited from PhD and post-doctoral researchers. These should be in A0 portrait format. Please summarise your poster in about 300 words and send this to [conferences@soci.org](mailto:conferences@soci.org) by **5 February 2013**. Prizes will be awarded.

#### Registration

##### Earlybird fee before 1 Feb 2013

SCI Member - £120

SCI Student Member - £35

Non-Member - £160

Subsidised SCI Member - £80

##### Standard fee after 1 Feb 2013

SCI Member - £144

SCI Student Member - £42

Non-Member - £192

Subsidised SCI Member - £98
