

**8th AGRI-net International Conference:
Plant Chemical Biology
Focus on Physical Chemistry**

Thursday 13th June 2019

**Syngenta Jealott's Hill International Research Station
Berkshire, UK**

syngenta

Confirmed speakers

- Douglas Kell - University of Liverpool
- Oscar Ces - Imperial College London
- Rob Law - Imperial College London
- Maddalena Bronzato – Syngenta

Call for abstracts – Posters and oral presentation

Agri-net promotes the scientific interactions between academic and industrial researchers and will in its 8th plant chemical biology conference focus on the key role that physical chemistry plays in the discovery and development of new agrochemicals. However, we also welcome any scientific contributions – oral presentations and posters - outside this years' focus area.

Interested delegates should submit a preliminary abstract when registering to attend the conference. Please submit your abstract upon registration, by 23rd May 2019.

Posters will be displayed throughout the meeting and talks will also be selected from submitted abstracts by the organising committee.

Registration

The event is FREE but spaces are limited and registration is required. Please register online by 23rd May 2019.

At <https://forms.gle/eVaC7rVkZ9uDqrcR7>

Free lunch and refreshments will be provided on the day.

Venue

Syngenta Jealott's Hill International Research Station, Berkshire, UK, RG42 6EX

Organising Committee

- Christopher M. Baker - Head of Physical Chemistry, Syngenta
- Andrew Crossthwaite - Head of Insecticide Bioscience, Syngenta
- Rudiger Woscholski - Co-director of Agri-net, Imperial College London
